technology

DOQMA CONSULTING

Who Are **We**?

We are a consulting company that helps organizations transform and use Information Technology (IT) **strategically**.

We use cutting-edge approaches, techniques, methodologies, and tools, supported by a **high-performance** team

We use architecture as a **tool**, creating both business and technology designs that enable companies to bring their future vision to life.

Projects in 6 Countries

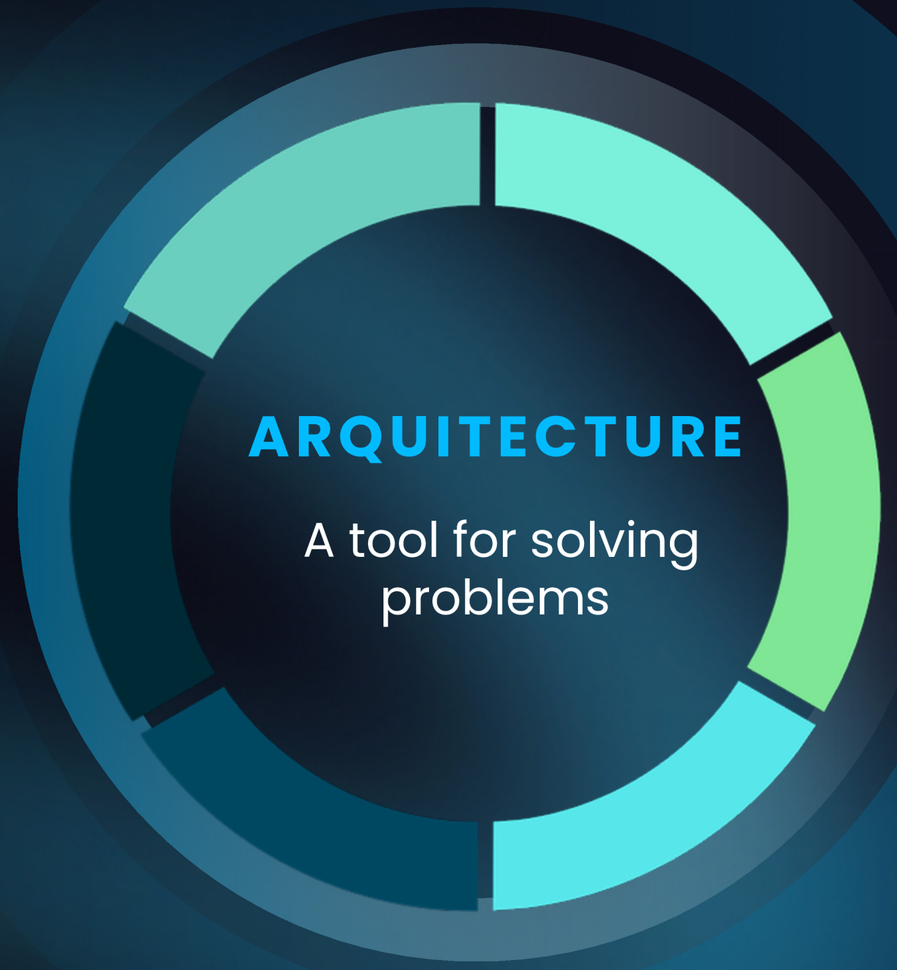
Using architecture as a tool to solve complex business and technology challenges.

Working with multiple companies, business groups, and industries.

DOQMA CONSULTING

What Needs Do We Address?

Any business and/or information technology (IT) challenge that, due to its complexity, requires solid models and designs to define a roadmap for implementation and organizational transformation.



What Domains Are We Experts In?

Enterprise Architecture

- IT strategic plans
- Transformation roadmaps
- Architecture function design
- IT governance models

Information & AI

- Data architecture
- Data analytics
- Artificial intelligence
- Information governance

Process Architecture

- Architecture design
- Process modeling
- Process optimization
- Automation
- Hyperautomation

Business Architecture

- Business models
- AI-driven businesses
- Innovation and new business development
- Digital customer experience
- Operating models

Applications Architecture

- Integration architecture
- Reference architecture
- Solution architecture
- Software architecture
- AI architecture

Infrastructure Architecture

- Hybrid and cloud architecture
- Security architecture

DOQMA CONSULTING

What Needs Do We Address?

DOQMA CONSULTING

1 Technology Optimization

- Support in the evolution of the technology ecosystem
- Analysis and resolution of technology-related issues
- Design of technology migration plans

2 Technological Transformation

- Support in the evolution of the technological ecosystem
- Analysis and resolution of technological problems
- Design of technological migration plans

3 Internal architecture capability

- Assessment of internal architecture capabilities
- Design and structuring of the architecture function (CoE)
- Strategic use of architecture within the organization

4 Enterprise and Reference Architecture

- Architecture assessment: comprehensive evaluation of the current technology landscape
- Technical debt and risk analysis
- Definition of modernization and technology simplification roadmaps

What Needs Do We Address?

DOQMA CONSULTING

5 Digital Transformation

- Assessment of the organization's digital maturity
- Optimization and hyperautomation of the operating model
- Transformation of operating models to build leaner, more efficient, and agile organizations supported by technology

6 Strategic Use of Information and AI

- Connecting business architecture with the strategic use of AI
- Design of AI adoption roadmaps
- Design of data and AI platforms
- Data and AI governance and maturity

7 Process Architecture

- Assessment and analysis of the current process architecture
- Development of business capability maps
- Design of value streams and target process architecture
- Design of procedures and workspaces for hyperautomation

8 Training, Upskilling & Coaching

- 360° assessment of architecture teams
- Design of customized training and development plans
- Theoretical and practical training across all architecture domains
- Executive awareness and education on architecture

What Makes Us Unique

DOQMA CONSULTING

PEOPLE

We have strong academic backgrounds and extensive experience across multiple industries.

AGILITY

We work in short cycles focused on solving problems and delivering value, addressing complex challenges incrementally.

HIGH QUALITY

Deliverables are tailored to each client, always designed to communicate effectively using industry standards and best practices.

AT THE FRONTIER OF KNOWLEDGE

We use the latest techniques, methodologies, and tools, bringing cutting-edge approaches to our clients.

PRAGMATISM

We adapt methodologies and tools to focus on solving problems and designing solutions according to the client's specific needs.

INNOVATION

We help our clients do things differently, create new products, and become more digital.

DOQMA CONSULTING

Our Architects

Engineers with postgraduate education (Master's and/or PhD degrees) and industry certifications in leading frameworks and tools.

EDUCATION

Between 5 and 30 years of experience leading complex transformation projects across various countries in Latin America.

EXPERIENCE

We respect everyone, understand that different perspectives and opinions exist, are deeply committed to the quality of our work, and are trustworthy and generous with our knowledge.

VALUES

How can we work together?

Fixed-Scope Projects

We define objectives, scope, deliverables, team composition, and timelines. We track progress weekly and deliver results incrementally, always focused on creating business value.

Architecture Factory

We create one or more flexible architecture teams assigned to specific tasks, working in short cycles and addressing challenges based on the organization's needs and priorities

Architecture as a Capability

We provide an architecture team with an agreed-upon configuration that works alongside the organization's teams for a fixed period, executing assigned activities.

Strategic Advisory

We define a pool of hours from partners and senior consultants to provide direct support to executive leadership in decisions related to the strategic use of technology.
